

# bp Glass Garage Doors & Entry Systems, Inc.

## Storefront Garage Combo Line (US & Intl. Pat.)

bp manufactures Glass Garage & Matching Entry Doors (in combination), to comprise our bp - Storefront Garage Combo Line. This Architectural blend focuses on Form & Function, allowing the end user to implement large and operable window walls, or limit access to an entry door, all while sealing the bldg. envelope.

The bp - NFRC Air Resistance Package provides an airtight seal; where building code compliance is required. bp Glass Doors have been tested and certified as a "whole system", and not just glass alone. The bp "Fully Insulated Frame Technology" (US & Intl. Pat.) is the key component for eliminating air leakage, when using Full Vision Type Doors to seal the building envelope, or any HVAC climate-controlled space; well below the allowable residential and commercial standards.
